

I would like more information on (check all that apply):

- Breast Augmentation:** Enhance the size and shape of the breasts. Our VECTRA 3D imaging technology allows you to visualize which implant size and profile will look best on your frame.
- Breast Lift:** Restoring breasts to a higher placement while improving the appearance and positioning of the nipples.
- Tummy Tuck:** Removes loose skin and fat while tightening your abdominal muscles to create dramatically firmer, slimmer contours.
- Mini Tummy Tuck:** Repairs lower abdomen displaying poor muscle tone, along with moderate excess skin and fat resulting in a firmer, flatter, more youthful looking tummy.
- Mommy Makeover:** One or several procedures to restore the physical changes made by bringing another life into the world.
- Brazilian Butt Lift:** Correct a bottom that looks too flat or square, or that's changed shape due to aging or fluctuations in weight over the years.
- Liposuction:** Improvement of the shape and contour of your body by permanently removing localized areas of fat.
- Coolsculpting:** FDA approved fat reduction technology. Our office offers DualSculpting, which allows us to treat twice the amount of fat in one hour.
- Facial Lipo/Chin Lipo:** Minimize or eliminate unwanted fat to reveal more youthful facial contours.
- Facelift:** Correction of sagging skin and wrinkles on the cheeks, jawline, and neck.
- Eyelid Surgery:** Droopy eyelids, bags and puffiness under the eyes are common concerns among patients seeking eyelid surgery.
- Brow Lift:** Improve the upset or tired look that a sagging brow can create, look younger and more refreshed.

Our goal is the same as yours: to help you feel and look your very best, naturally.
